

Journey Management

Context

PGI was approached by an existing Financial Sector client of PGI Intelligence to see if we could provide journey management support to their CEO and COO who were embarking on a fast-paced, short notice business trip to Japan and Hong Kong.

Solution

PGI's aim was to provide a timely, safe, cost effective and efficient journey management service in order to allow the CEO and COO to have a successful business venture.

With 48 hours' notice PGI developed an effective journey management solution combining a good understanding of the operating environment, sourcing of appropriate high specification corporate vehicles and appropriately trained drivers combined with 24/7 operations support providing the required flexibility to allow the client to achieve their business aims.

Benefits

PGI's client was able to concentrate on their key business concerns whilst all the logistical and operational elements of their trip were catered for. Duty of care obligations were met by the organisation and reputational and operational risk reduced.
